

American Polywater Wind Energy Products

We offer premium cleaning and construction products to help build and maintain power generating systems safely. Multiple solvent options are available to clean wind tower nacelles, generators, gear boxes, electrical apparatus, and hydraulic equipment. High-performance lubricants can help install cable into conduit, loosen and protect exposed bolts, and prevent corrosion. Specialty sealants and adhesives can seal ducts and permanently connect dissimilar conduit materials such as HDPE and PVC.

GENERAL PURPOSE & HIGH VOLTAGE CLEANERS

Grime-Away™ wipes are heavy-duty towelettes premoistened with a multipurpose cleaning solution. Grime-Away™ moisturizes and softens hands while cleaning tools, equipment, and work surfaces. Grime-Away™ towels feature a textured side to quickly remove petroleum and silicone greases, dirt, c-cement, adhesives, paint, caulk, lubricants, tar, and other grime.

Cat. No.	Pack. Size	Case Qty
HTC-D72	Dispenser with 72 10" x 12" premoistened wipes	6
HTC-1	Individual presaturated 8" x 12" premoistened wipe	144

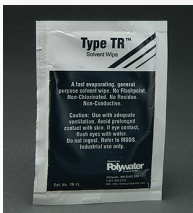

The B-1 Boom Cleaner Saturated Wipe cleans grease, salt spray, dirt, hydraulic fluid, and oil off fiberglass and metal surfaces. The compact, lightweight wipes are easily carried up wind towers for cleaning the nacelle. Also available in a gallon concentrate for spray applications.

Cat. No.	Pack. Size	Case Qty
B-1	24" x 24" saturated towel	24
BWC-128	1-gal concentrate	4

Type HP™ Multipurpose Cleaner/Degreaser is a general purpose electrical cleaner. It will dissolve grease, corrosion inhibitor, tar and adhesive residue. It dries slowly, but residue free.

Cat. No.	Pack. Size	Case Qty
HP-P158ID	Tandem wipe-wet/dry	144
HP-1	Wipe-large	144
HPY-12	16-oz. aerosol can	12
HP-35LF	1-qt flip top bottle	12
HP-128	1-gal	4
HP-640	5-gal	1

Type TR™ is a fast evaporating, non-flammable cleaner available in convenient wipes.

Cat. No.	Pack. Size	Case Qty
TR-1	TR-1 wipe (small)	96
TR-1L	TR-1L wipe (large)	144
TR-16	16-oz. aerosol can	12

CABLE PULLING LUBRICANT

Type NN™ is a clean, slow-drying, silicone-based cable pulling lubricant. Type NN™ offers superior friction reduction and is ideally suited for HDPE duct. Non-stringy Type NN™ pours and pumps easily, and is suitable for use with most common cable jacket types. Research has shown that Type NN™ out performs all other lubricants in water-filled ducts.

Cat. No.	Pack. Size	Case Qty
NN-35	1-qt bottle	12
NN-128	1-gal jug	4
NN-320	2½-gal jug	2
NN-640	5-gal pail	1
NN-Drum	55-gal drum	1

AEROSOL CLEANERS

Type P7™ Multipurpose Oil is a multi-functional lubricant with numerous electrical and industrial uses. P7™ cleans grime, loosens rust, and penetrates frozen parts. It also acts as a moisture displacer and rust inhibitor.

Type CG™ Cold Galvanize is an industrial aerosol coating for metal protection and repair. Powerful CG™ contains 95% pure zinc; when sprayed on metal it forms a zinc-rich coating that prevents rust and inhibits corrosion through sacrificial galvanic action. Type CG™ aerosol offers easy on-the-job application, and is ideal as a primer or for touch-up. Quick drying CG™ contains no chlorinated solvents, and is excellent for weld coating.

Type KC™ Electrical Cable and Equipment Cleaner is a fast evaporating, non-flammable electrical contact cleaner. It is non-conductive and compatible with most plastics.

Type FD™ Electrical Contact Cleaner is a fast drying, multi-purpose industrial and maintenance cleaner. It replaces ozone-depleting CFC's, trichloroethane, HCFC's, perchloroethylene and other carcinogenic chlorinated solvents. FD™ Cleaner effectively dissolves industrial grimes, greases, lubrication fluids, silicone, tars, adhesives, and fluxes.

Cat. No.	Product	Pack. Size	Case Qty
P7-12	Type P7	16 fluid oz. aerosol can (475 ml). Net wt 12 oz.	12
CG-13	Type CG	16 fluid oz. aerosol can (475 ml). Net wt 13 oz.	12
KC-4	Type KC	6 fluid oz. aerosol can (175 ml). Net wt 4 oz.	12
KC-16	Type KC	16 fluid oz. aerosol can (475 ml). Net wt 14 oz.	12
FD-9	Type FD	16 fluid oz. aerosol can (475 ml). Net wt 9 oz.	12

SEALANTS & ADHESIVES

BonDuit® Conduit Adhesive A high strength sealant for bonding polyethylene, PVC, fiberglass, metals, and composites. Creates airtight and watertight splices. Bonds are durable with high tensile strength within an hour. The strong bonds withstand movement and vibration.

Polywater® FST™ Duct Seal/Water Block Kit contains a cartridge with a two-part foam base that, when injected, expands and hardens, keeping out water, acids, greases, insects, rodents, etc. The kit contains enough material to seal up to 3 large ducts. A separate, reusable, ratchet application tool is used to inject the foam. The foam base is mixed in equal parts as it is pushed through the mixing nozzle. FST is superior to open celled foam in cans!

Cat. No.	BonDuit Conduit Adhesive	Case Qty
BT-KIT	Kit contains 2 adhesive cartridges, 8 mixing nozzles, 1 strip of sanding cloth, and 8 TR-1 cleaning wipes. (Dispensing tool not included).	1
BT-KITG	Kit contains 2 adhesive cartridges, 8 mixing nozzles, 1 strip of sanding cloth, 8 TR-1 cleaning wipes, and 1 dispensing tool. (USA only)	1
BT-KITB6	Bulk kit contains 12 adhesive cartridges, 48 mixing nozzles, 6 strips of sanding cloth, and 48 TR-1 cleaning wipes. (Dispensing tool not included).	1
BT-KITB6G	Bulk kit contains 12 adhesive cartridges, 48 mixing nozzles, 6 strips of sanding cloth, 48 TR-1 cleaning wipes, and 1 dispensing tool. (USA only)	1
BT-CART12PK	Bulk package of 12 adhesive cartridges and 36 mixing nozzles only.	1
BT-TOOL	1 Dispensing tool	1
BT-10NOZZLE	10 Mixing nozzles	1

Cat. No.	FST Duct Sealant	Case Qty
FST-180-KIT	1 6-oz cartridge (cat# FST-180), 2 24" Foam damming strips (cat# FST-DAM), 3 Mixing nozzles, 1 Pair disposable gloves, 1 Positioning rod for foam dam, 1 Pre-treating wipe (cat# CD-1), 1 Resealing cap and 1 Instruction sheet (Application tool not included.)	6
FST-180	1 6-oz cartridge with 3 mixing nozzles	12
FST-TOOL	1 Applicator gun	1
FST-DAM	1 24" Foam damming strip	24
CD-1	1 Conduit pre-treating wipe	288
